

[MISSION BRIEFING_V1.1]

>>> [OPERATIONAL_GOAL]

To benchmark cognitive processing speed and tactile accuracy through the Parkway OS Terminal interface.

>>> [WPM_ALGORITHM]

Standardized calculation: $(\text{Chars Typed} / 5) / \text{Elapsed_Time}$. This accounts for space and punctuation weighting.

>>> [ACCURACY_INDEX]

Percentage of characters correctly synchronized with the target data stream. Measures transmission integrity.

>>> [PRIVACY_SHIELD]

PIPEDA COMPLIANT. System performs a Reverse Lookup on Operative IDs to strip email data before database commit.

>>> [TELEMETRY_SOURCE]

Data is source-tagged as 'desktop' or 'web' to isolate environment-specific performance variables.
